CASE STUDY: COVENT GARDEN ESTATE, OCS

NATURALLY POWERFUL. NATURALLY SAFE. NATURALLY MADE.

CASE STUDY: COVENT GARDEN ESTATE, OCS

Covent Garden, London

OCS, working in partnership with Covent Garden, has successfully implemented Ozoklenz across the estate as part of its soft services delivery. The introduction of Ozoklenz supports OCS's commitment to maintaining exceptional hygiene standards while creating a safer, healthier and more sustainable environment within one of London's busiest destinations.

With high footfall from tenants, visitors and the public, Covent Garden requires a robust cleaning approach that minimises risk while maintaining consistently high standards. OCS adopted Ozoklenz to remove reliance on traditional chemical cleaning products, reducing exposure to harsh substances while supporting the site's wider sustainability objectives.

The transition to Ozoklenz has delivered clear operational and environmental benefits. Cleaning teams now use a more user-friendly and efficient solution, streamlining daily tasks and significantly reducing health risks associated with chemical handling and storage. At the same time, the reduction in chemical use has helped to lower waste and environmental impact across the contract.

"Ozoklenz is not only effective at tackling dirt and bacteria around our site, but it also supports our sustainability drive by reducing our chemical waste and our environmental impact."

- Soft Services Manager

HOW SUCCESSFULLY DID OZOKLENZ WORK?

Our Approach

When OCS approached Ozoklenz, we understood their concerns and goals immediately. We provided a comprehensive overview of our ozone cleaning technology, detailing how it works and the benefits it offers compared to traditional chemical cleaners.

Our team emphasised the following key points:

Safety

Ozoklenz uses ozone, a natural substance, to eliminate the risks of chemical cleaners, avoiding skin and respiratory irritations and leaving no harmful residues.

Environmental Impact

Ozoklenz is eco-friendly, significantly reducing the environmental footprint by eliminating harmful chemicals from the cleaning process.

Efficiency

Ozoklenz matches or exceeds the effectiveness of traditional chemical cleaners in eliminating bacteria, viruses, and contaminants.

“

“The use of Ozoklenz has brought significant benefits to the OCS soft service team and to our client at the Covent Garden site. This innovative cleaning technology ensures a safer and healthier environment for our staff, our tenants and our visitors while maintaining exceptional hygiene standards.”

For the Covent Garden contract and the wider OCS business, Ozoklenz reinforces our commitment to sustainability and enhances our reputation for maintaining eco-conscious and well-managed destinations.”
