## HOW DOES OZOKLENZ BENEFIT MY CLIENT?

Ozoklenz’s chemical-free solution is a valuable asset for customers seeking to enhance their Environmental, Social, and Governance (ESG) performance. From an environmental standpoint, the use of Ozoklenz eliminates the reliance on harmful chemicals, mitigating the ecological impact associated with traditional processes. Ozoklenz reduces between 70 - 100% of chemicals. This chemical reduction usage helps clients align their principles of environmental stewardship and responsible resource management.

## ENVIRONMENTAL

Ozoklenz offers a significant environmental benefit by revolutionising traditional cleaning practices and minimizing the ecological impact associated with chemical-based solutions.

**NO NEED FOR  
HARSH  
CHEMICALS**

**REDUCE  
POLLUTION**

**REDUCE  
DELIVERIES**

Ozone, naturally converting to oxygen upon contact with organics, ensures Ozoklenz’s cleaning leaves no harmful residues, safeguarding the environment and supporting businesses in reducing their carbon footprint. This aligns with the UK’s 2050 carbon neutrality goal, positioning Ozoklenz as a green cleaning solution that champions both cleanliness and sustainability.

## SOCIAL

**HAPPIER  
WORKSPACE**

**MITIGATE  
HEALTH RISKS**

**SUPPORT  
WIDER COMMUNITY**

Ozoklenz replaces harmful cleaning chemicals with a safer, eco-friendly alternative, enhancing workplace safety and meeting eco-conscious expectations. It signals a company’s commitment to environmental responsibility and social welfare, positively impacting public perception and community health, as well as the physical benefits experienced by all using the facilities. Essentially, Ozoklenz supports a more responsible and sustainable business approach.

## GOVERNANCE

**COST  
EFFECTIVENESS**

**REDUCE  
ENVIRONMENTAL  
IMPACT**

**IMPROVE  
STAKEHOLDER  
TRUST**

Ozoklenz is key for responsible governance, enhancing a company’s ESG profile by reducing environmental harm through chemical-free processes. It supports risk management and compliance, safeguarding employee and community health. Additionally, its cost-effectiveness promotes financial stability. Incorporating Ozoklenz into governance strategies signals a dedication to sustainable, responsible business, establishing the company as a leader in innovative, eco-friendly, and socially responsible practices.

## ECONOMIC

**SUSTAINABLE & COST-EFFECTIVE**

**FINANCIAL STABILITY**

**FORWARD-LOOKING APPROACH**

The COVID-19 pandemic increased demand and costs for resources, particularly chemicals. Ozoklenz offers a strategic, sustainable, and cost-effective solution to these challenges. It provides a chemical-free alternative, reducing financial burdens and ensuring predictable budgets. Amid market volatility from ongoing global crises, Ozoklenz supports stability, efficiency, and financial prudence, securing budget planning for the future.

## TECHNOLOGY

**INNOVATIVE TECHNOLOGY**

**ECO-FRIENDLY & EFFICIENT**

**INDUSTRY TREND ALIGNMENT**

Ozoklenz harnesses nano-bubble technology for a superior, eco-friendly clean. Unlike traditional methods using larger bubbles that miss finer contaminants, nano-bubbles penetrate smaller gaps, effectively reducing surface bacteria and viruses. These tiny, neutrally buoyant bubbles stay suspended in the solution, ensuring the ozone they carry is evenly distributed and more effectively attaches to and removes dirt, offering a more thorough clean even on uneven surfaces.

### CASE STUDY:

We recently helped one client prevent a minimum of 20kg of packaging waste as a direct result of the reduced quantities of cleaning chemicals being ordered.

**20kg**  
Packaging waste reduction

## OZOKLENZ CAN HELP YOUR CLIENT BENEFIT FROM THE FOLLOWING:

- For every Ozoklenz Unit purchased 10 trees are planted.
- For every Ozoklenz unit installed catering and cleaning consumables are donated to designated charities.
- For an average size building in London Ozoklenz eliminates the need of 500 plastic bottles every year. This equates to 1/3 of a ton of plastic.
- On average Ozoklenz means 24 less deliveries per year. On an average delivery run into London this equates to 0.5T of carbon emissions eliminated every year. That's the average emissions of one passenger on a flight to Spain and back.
- Additional space in cleaning cupboards for other products – reducing the need of regular deliveries for wash room and janitorial consumables too.
- No risk to employees – no COSHH data required and no chemical awareness training needed. This also results in a reduction in paper, yet another environmental benefit.

## CLIENT FORESTS

The Ozoklenz Team are extremely passionate about sustainability and maintaining environmental standards within everything we do. That is why we are introducing our new initiative, Client Forests. As a company, we will enable you to plant an entire forest, in which you will receive constant updates and tracking as to the welfare of the forest and the surrounding areas. For every unit purchased, we will plant 10 trees, growing your forest.

## ECO1 DETAILS:

**Name:** Ozoklenz ECO1

**Flow Rate:** 11 Litres per Minute

**Concentration:** 1.5 PPM of Ozone in solution

## ECO2 DETAILS:

**Name:** Ozoklenz ECO2

**Flow Rate:** 4-5 Litres per Minute

**Concentration:** 1.5 PPM of Ozone in solution

**For each Ozoklenz unit purchased, we will plant 10 trees. This is equivalent to 7.5 tonnes of CO2 removed from the atmosphere over the trees lifespan.**

## READY FOR MORE?

One of our favourite things to do is visit potential new clients and demonstrate our powerful, planet-friendly cleaning solution. We're always on hand to help and chat, too.
