INTRODUCING THE

ECO3

HANDHELD

TURN SIMPLE TAP-WATER INTO
A POWERFUL CLEANING SOLUTION

Cleans, Sanitises and Deodorises!

AQUEOUS OZONE ON DEMAND

Chemical-free cleaning in the palm of your hand. The patented Diamond-Technology in the ECO3 produces aqueous ozone which is one of nature's strongest cleaning agents.

Aqueous ozone is a natural cleaner, sanitiser and deodoriser and is more powerful than bleach but completely safe to use on all surfaces. Aqueous Ozone is EPA and GRAS approved.

for
EFFECTIVE RESULTS AT THE TOUCH OF A BUTTON

NON-STOP CLEANING AT THE TOUCH OF A BUTTON

SIMPLY FILL THE UNIT WITH ORDINARY TAP WATER

Ozone is naturally attracted to organic substances like bacteria, moulds, viruses and other germs. It works by attacking the cell wall of the organism which is completely destroyed and cannot regrow or mutate. Once ozone has done its job all that is left is water and oxygen.

Sanitises ***Cleans*** ***Kills Viruses & Bacteria*** ***Eco-friendly***

Using the ECO3 means that you don't need all of the manufactured cleaning agents which fill up your cleaning cupboard and cost you a lot of money. Using the ECO3 means that you are helping the planet by reducing single-use plastics, waste-to-landfill, delivery journeys and CO2 emissions.

HOW IT WORKS

ECO3 Handheld utilises electrolytic technology incorporating diamond-wafers to produce ozone gas from ordinary tap water. Each time the button on the handheld unit is pressed, aqueous ozone is produced. The solution is sprayed automatically, on-demand.

BENEFITS

ECO3 Handheld is easy to use, lightweight, compact and portable. It removes the need to use single-use plastic bottles full of traditional harsh chemicals, replacing these with an environmentally friendly alternative.
