

INTRODUCING THE **ENOZOPRO** HANDHELD SPRAY BOTTLE

The Ozoklenz Aqueous Ozone Spray Bottle replaces traditional cleaners and sanitisers by converting portable water to ozonated water.

AQUEOUS OZONE ON DEMAND

Aqueous Ozone has been proven to kill **>99.999%** of the most common bacteria and viruses in just **30 sec**, without using harsh chemicals. More effective than traditional cleaners and sanitisers, these AO Water units deliver an endless supply of an all-natural and safe oxidising agent.

BENEFITS TO USER
Sanitises, Cleans and Deodorises all Surfaces
Up to 80% Savings of Budget for traditional Cleaning and Sanitising Agents
Safe, Effective, Economical and Sustainable
Lightweight and Durable Handheld Bottle
Easy-To-Use

SYSTEM FEATURES
On-Site, On Demand Generation of Aqueous Ozone
Lasts up to 5,000 Refills - Replacement of 1,000's of plastic bottles
Unit weighs just 1kg
Dimensions are 10cmx10cmx28cm
400ml Capacity
Rechargeable Lithium Ion Battery
Two Year Product Warranty

NATURALLY POWERFUL. NATURALLY SAFE. NATURALLY MADE.

AQUEOUS OZONE ON DEMAND TECHNOLOGY

NATURALLY POWERFUL. NATURALLY SAFE. NATURALLY MADE.

Ozoklenz's Aqueous Ozone technology simply converts potable water into ozonated water. This highly oxidised water is a powerful antimicrobial agent that safely and effectively inactivates most bacteria and viruses at >99.999% in less than 30 secs. Aqueous Ozone is also a very versatile solution that can be utilised to clean and deodorise in any environment

WHAT IS AQUEOUS OZONE?

In nature, ozone is formed by lightning causing an ordinary oxygen molecule (O₂) to split into two oxygen atoms (O), which rejoin the ordinary molecules (O₂) to form Ozone or O₃.

Ozone can also be synthesised or man-made by combining an electrical charge with oxygen creating O₃ which is infused into water. Thus, the term Aqueous Ozone.

Our EPA registered technologies allow our customers to safely and effectively sanitise, clean, and deodorise any environment without the use of chemicals

WHAT ARE THE BENEFITS OF AQUEOUS OZONE?

Generate an Endless Supply of a Safe, yet Highly Effective Sanitiser and All-purpose Cleaner

Saves up to 80% in Monthly Costs for Traditional Chemical-based Cleaning/Disinfecting Agents

Produces On-site, On-demand Ozonated Water

No Chemicals to store, mix, transport, handle, dispense, etc

No PPE Requirements for staff or other personnel to dispense and apply the ozonated water

Eliminate COSHH training and paperwork

NATURALLY POWERFUL. NATURALLY SAFE. NATURALLY MADE.
