CASE STUDY: LAKESIDE SHOPPING CENTRE

West Thurrock, Grays

Lakeside Shopping Centre is a premier retail destination in the UK, known for its commitment to sustainability and customer experience. The shopping centre faced challenges with traditional cleaning methods as excessive use of chemical cleaners not only posed health concerns for visitors but also affected the ambience of a safe, welcoming environment that shoppers expect. Lakeside relied heavily on chemical cleaners, leading to concerns over safety, environmental impact, and ongoing costs.

Challenge

Lakeside Shopping Centre sought to reduce its reliance on cleaning chemicals aiming to create a healthier environment for shoppers and employees while also lowering operational costs. Traditional cleaning

methods contributed to a significant carbon footprint and potential health risks associated with chemical exposure,

Solution: Ozoklenz

To address these challenges, Lakeside installed the Ozoklenz Eco1 unit, a revolutionary aqueous ozone dispenser; an easily installed system that does not disrupt operations and is very easy to use. By eliminating conventional chemicals, the Ozoklenz Eco1 allowed the centre to significantly cut both direct chemical costs and safety-related overheads.

"We are delighted with the performance of the Ozoklenz unit [...] this product is highly effective and we would recommend it without hesitation"

Environmental Services Manager

KEY FEATURES OF THE OZOKLENZ ECO1 UNIT:

Chemical-Free Cleaning

The unit eliminates up to 90% of cleaning chemicals, which reduces health risks for staff and aligns with the centre's sustainability commitments.

Efficiency

The ability to generate 11 litres of solution per minute means less time spent preparing cleaning materials, allowing staff to focus on maintaining high standards across the entire facility.

Powerful Cleaning

As aqueous ozone works on impact, cleaning is both faster and more thorough, especially crucial in high-traffic areas where cleanliness is vital.

Safety

The solution is safe for all surfaces and materials, ensuring peace of mind for staff while being gentle and non-toxic for humans.

Fill spray bottles.

Fill mop buckets.

Fill floor scrubbers.

HOW SUCCESSFULLY DID OZOKLENZ WORK?

Results

Since the installation of the Ozoklenz Eco1 unit, Lakeside have experienced significant improvements:

Reduced Chemical Use

The shopping centre successfully eliminated up to 90% of its cleaning chemicals, dramatically lowering environmental impact.

Simplified Operations

Eco1 is a simpler 'all in one' solution that requires no COSHH, and will safely and effectively clean, sanitise, disinfect, and deodorise, all at the same time.

Our Partnership

Ozoklenz has transformed the cleaning operations at Lakeside Shopping Centre, providing a sustainable and effective alternative to traditional cleaning methods. The successful implementation of the Eco1 unit not only supports the shopping centre's commitment to sustainability but also provides a safer environment for customers and employees. If your facility is also struggling with rising cleaning costs and environmental challenges, Ozoklenz can provide the solution.

We are delighted with the performance of the Ozoklenz unit. It has proven to be incredibly easy to integrate into our operations and has significantly advanced our sustainability initiatives. We have achieved a notable reduction in consumable costs and successfully eliminated the risk of skin irritants for our staff. Overall, this product is highly effective, and we would recommend it without hesitation.
