# We care about bubble earth...

So we make sure there's  
no chemicals in our  
hygiene bubbles

Chemical Free Cleaning

ozoklenz

**Our Ozoklenz units reduce chemical usage, consumption of single-use plastics, and your overall environmental impact.**

Reduce the need of almost all chemicals

## Chemical Free Cleaning

ozoklenz

**Unlike other Aqueous Ozone systems, Ozoklenz eliminates the ongoing costs associated with stabilising products, as no replacement cartridges are needed.**

## Chemical Free Cleaning

ozoklenz

**Aqueous Ozone is a fully sustainable, natural cleaner and sanitiser, and is completely harmless to humans and animals. It is more powerful than bleach and will oxidise immediately on contact. It is effective against bacteria, moulds, viruses, and is a powerful deodoriser.**

## Chemical Free Cleaning

ozoklenz

**It is easy and safe for your staff to produce and use, with no COSHH training required. Every time you use the Ozoklenz units you are reducing chemical use, increasing cleaning efficiency, and helping to save the planet!**

No COSHH requirements and zero plastic and packaging waste

A Natural Product

ozoklenz

**Ozone is produced naturally during thunderstorms. We replicate lightning in the Ozoklenz unit.**

- Air is passed through a drying chamber
- High voltage is applied to oxygen (O<sub>2</sub>)
- Ozone gas is produced (O<sub>3</sub>)
- The gas is injected into mains water making aqueous ozone
- Aqueous ozone is dispensed into your spray bottle, mopbucket or cleaning equipment

ozo-oxider

ozoklenz

## How Ozone Cleans

Ozone is the strongest natural oxider

- It is attracted to organic organisms (Bacteria, viruses, moulds etc)
- It destroys the cell wall of the organism
- The organism is destroyed and cannot regrow or mutate
- The ozone return to water and oxygen
- It leaves no residue so no need to rinse

# Ozoklenz at a Glance

- Ozone is the world's strongest oxidising agent
- It is 30 times more powerful than bleach
- It works 3,000 times faster than bleach
- It contains no synthetic chemicals
- No stabiliser cartridges.
- No ongoing cost for solution.
- No ongoing delivery miles.
- No COSHH.
- No single-use plastics.
- No orders or invoices to process

# Additional Information

- Produces up to 11L of Aqueous Ozone per minute
- Reduces transport, packaging and storage requirements
- Can be dispensed into bucket, machine or trigger bottle
- Unit will run continuously – unlike other systems where supply stops if the filter cartridge runs out
